

Ahmad Jazil Faiz

Software Engineer

ahmadjazilfaiz24@gmail.com | 081287989375 | Jagakarsa, Jakarta Selatan

ABOUT ME

Informatics graduate from Gunadarma University with a strong interest in Full Stack Development and software engineering. Experienced in developing web applications using Django and React, implementing frontend and backend features, REST APIs, database integration, and application deployment. Developed a full-stack e-commerce application with authentication, shopping cart, order management, and payment integration. Also contributed to a machine learning web application that processed 41,188 customer records and identified 4,640 potential leads, achieving an AUC of 0.81. Proficient in Python, JavaScript, SQL, Git, and Linux, with strong problem-solving and debugging skills.

EXPERIENCE

Frontend Web Developer Intern – PT Cronos Studio Indonesia *March 2025 – August 2025*

- Contributed to the development and maintenance of a Drupal 10 recruitment website in a production environment, supporting daily operations and website content management.
- Developed and enhanced responsive frontend features using HTML, CSS, JavaScript, and Twig, ensuring consistent layouts across different screen sizes and browsers.
- Performed cross-browser and functional testing to identify and resolve frontend issues, improving application reliability and usability.
- Collaborated with design and backend teams to implement feature requirements and maintain consistency across UI, functionality, and system components.
- Used Jira to manage daily development tasks, track progress, and coordinate work throughout the development process.

Machine Learning Cohort - Dicoding Academy Indonesia in association with Accenture *August 2025 - January 2026*

Completed an intensive training program with hands-on experience in software development, application integration, testing, and deployment.

Projects & Achievements:

- Developed PRISM, a web-based predictive application processing 41,188 customer records and identifying 4,640 potential leads, achieving an AUC of 0.81.
- Developed application features and integrated backend components for data processing and prediction.
- Performed functional testing, debugging, and system validation to ensure application quality.
- Deployed applications on AWS and implemented monitoring using Prometheus and Grafana.
- Utilized Docker and GitHub Actions for containerization and deployment automation.
- Created technical documentation to support application maintenance and development.

End-to-End MLOps System Implementation - Dicoding Academy Indonesia in association with Accenture *October 2025 – December 2026*

- Implemented automated model training and deployment workflows using GitHub Actions and Docker.
- Integrated MLflow and DagsHub to manage experiment tracking, model versioning, and development workflows.
- Configured Prometheus and Grafana to monitor system performance and visualize operational metrics.
- Implemented alerting mechanisms to detect anomalies and service disruptions, supporting system reliability and maintenance.

Software Development Projects – Gunadarma University *February 2026 – September 2026*

- Developed a real-time DDoS detection application using Python, Random Forest, and Linux.
- Implemented automated attack mitigation through system-level IP blocking using iptables.
- Integrated Flask, Prometheus, and Grafana to build a real-time system monitoring dashboard.
- Conducted system testing and validation, achieving 99.89% accuracy and 99.94% F1-score.

Coffee Shop E-commerce Web Application – Academic Project *September 2024 – January 2025*

Developed a full-stack e-commerce application to support online coffee shop transactions using Django, React, JavaScript, and Tailwind CSS.

- Built core features including user authentication, shopping cart, order management, and payment integration.
- Integrated Django backend with PostgreSQL via Neon to support application data management.
- Deployed the application on Vercel with Neon database integration, making the platform accessible online.
- Performed functional testing and debugging to improve application reliability.

EDUCATION

Gunadarma University *September 2022 – August 2026*

Bachelor of Computer Science (Informatics)
GPA: 3.80/4.00

Studied programming, algorithms, computer networking, and information security fundamentals. Gained practical knowledge of IP addressing, subnetting, routing, network troubleshooting, and network simulation using Cisco Packet Tracer. Experienced in developing web applications with Django, React, and PostgreSQL, and completed a real-time DDoS detection and automated mitigation system as a final-year project.

CERTIFICATIONS

Orbit Future Academy *August 2026 - September 2026*

- AWS re/Start Graduate
- AWS Educate Introduction to Generative AI - Training Badge

Professional Certification Agency of Gunadarma University *July 2026*

- Associate Data Engineer

Universitas Gunadarma *Februari 2025 - Agustus 2026*

- JavaScript Programming Languange Fundamental
- Advanced Database Systems
- Oracle For Intermediate
- SQL Server for Intermediate

Dicoding Academy Indonesia *Agustus 2025 – Desember 2025*

- Getting Started with Programming for Software Development
- Programming Logic 101
- Git & GitHub Fundamentals
- AI Fundamentals
- Python Programming Fundamentals
- Machine Learning for Beginners
- Deep Learning Fundamentals
- Building Machine Learning Systems

SKILLS

- Programming: Python, JavaScript, SQL, HTML, CSS
- Frontend: React, Tailwind CSS
- Backend: Django, Flask, REST API
- Database: PostgreSQL, MySQL, SQLite, MongoDB
- Tools: Git/GitHub, Docker, Linux, AWS
- Testing & Monitoring: Functional Testing, Debugging, Troubleshooting, Prometheus, Grafana
- Additional: Machine Learning, Computer Networking
- Soft Skills: Problem Solving, Analytical Thinking, Attention to Detail, Teamwork
